

## **SPRINGETTSBURY TOWNSHIP RECYCLING COMMITTEE ANNUAL REPORT**

The Recycling Committee in the year 2002 took a new approach of focusing on just one or two issues. We began formulating a plan for cardboard recycling involving the use of Boy Scouts for site monitors. After much negotiating this plan failed. We have since regrouped and are approaching the issue from a different perspective. We are hoping for success in 2003.

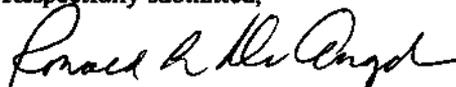

The other main project that we assisted with was the Township Commercial Recycling Survey. Although this survey concentrated on restaurants, the Committee provided to Steve Deasy of Gannett Fleming as much information as possible (especially the results of a previous survey). We made constructive comments of the final draft of the survey and will be doing follow-up visits to the establishments seeking help.

During the year Scott Wagner, owner of Penn Waste, took the Committee on a tour of his new recycling operation plus other facilities associated with his new location in Manchester.

Mr. John van der Harst (Recycling Advocates of Middle Tennessee) visited with us prior to his meeting with the York County Commissioners regarding the York County Solid Waste Authority incinerator and the ash it produces.

All in all this year has produced successes and failures but we will continue trying to make Springettsbury Township a great place to live.

Respectfully submitted,

**RONALD L. DIANGELO**  
Chairman, Recycling Committee
